

Usman Ali

Phone: +92 309 8430449 | Email: usmanali07137@gmail.com | GitHub | LinkedIn

Summary

Software Engineer with **2 years of hands-on experience** in backend and full-stack development, specializing in **FastAPI, Flask, Django, and scalable system design**. Experienced in building data-driven applications, secure APIs, and interactive dashboards.

Experience

Motive <i>Data Analyst</i>	Nov 2025 – Present <i>Lahore, Pakistan</i>
- Analyzed and validated large-scale datasets to identify inconsistencies, quality issues, and data patterns. - Performed data cleaning, validation, and quality assurance to maintain accurate and reliable datasets. - Reviewed data and workflow metrics to identify improvement opportunities and support data-driven decision-making.	
CybeCloud Pvt Ltd <i>Software Engineer</i>	Aug 2025 – Nov 2025 <i>Islamabad, Pakistan</i>
- Developed full-stack applications using FastAPI, Flask, Django, and React. - Built scalable backend systems and REST APIs with authentication and database integration. - Designed responsive UI components using HTML, CSS, and JavaScript.	
LogicChasers Pvt Ltd <i>Software Engineer</i>	Aug 2024 – Aug 2025 <i>Islamabad, Pakistan</i>
- Led backend development using FastAPI and Flask with JWT authentication. - Built data pipelines and dashboards using Pandas, NumPy, Plotly, and Power BI. - Developed full-stack applications and optimized SQL database performance.	

Projects

Full-Stack Web App & Data Visualization
- Designed responsive, branded web interfaces with clean UI/UX principles using HTML, CSS, Jinja2, and Flask, including dynamic dashboards and filterable forms. - Developed real-time interactive maps with GeoJSON, featuring multiple base layers, custom marker logic, tooltips, and export functionality for geospatial insights. - Built interactive stacked bar charts with Plotly for comparative consumption/waste analysis, including dynamic color assignment and real-time, session-based filtering. - Automated PowerPoint report generation with python-pptx, embedding charts, metadata, and uploaded images.
SalesHub – Full-Stack POS & Real-Time Sales Analytics
- Developed a full-stack POS and inventory system using FastAPI, React 18, SQLAlchemy, and SQLite for real-time sales and stock management. - Built interactive Plotly dashboards to analyze sales trends, inventory, customer activity, and key business metrics. - Implemented JWT authentication, transactional checkout, profit calculations, inventory updates, and validated REST APIs with OpenAPI/Swagger.
GrandHorizon – Hotel Cancellation Prediction & Revenue Intelligence
- Developed an end-to-end ML platform using 119K+ hotel reservations to predict booking cancellations and identify revenue-loss risks. - Built and evaluated Random Forest and HistGradientBoosting models, achieving 0.916 ROC-AUC while preventing data leakage. - Created interactive FastAPI dashboards with risk scoring, revenue-at-risk analysis, customer segmentation, dynamic pricing, and overbooking simulations.

Education

MNS University of Agriculture, Multan BS Computer Science	2020 – 2024
---	--------------------

Skills

Backend:	Python, FastAPI, Flask, Django, Node.js
Frontend:	React, HTML, CSS, JavaScript, Jinja2
Databases:	PostgreSQL, MySQL, SQLite
Data / AI:	Pandas, NumPy, Plotly, Power BI
Tools:	Git, GitHub, Bitbucket, Jira
