SUMMARY

Software Engineer with **2 years of hands-on experience** in backend and full-stack development, specializing in **FastAPI, Flask, Django and scalable system design**. Experienced in building data-driven applications, secure APIs, and interactive dashboards.

EXPERIENCE

Motive

Nov 2025 – Present

Data Annotator

Lahore, Pakistan

- Performed high-quality annotation for video datasets
- Ensured accuracy through validation, QA checks, and structured labeling workflows
- Supported AI/ML model training pipelines with consistent and scalable data processing

CybeCloud Pvt Ltd

Aug 2025 – Nov 2025

Software Engineer

Islamabad, Pakistan

- Developed full-stack applications using **FastAPI, Flask, Django, and React**
- Built scalable backend systems and REST APIs with authentication and database integration
- Designed responsive UI components using HTML, CSS, and JavaScript

LogicChasers Pvt Ltd

Aug 2024 – Aug 2025

Software Engineer

Islamabad, Pakistan

- Led backend development using **FastAPI and Flask** with JWT authentication
- Built data pipelines and dashboards using **Pandas, NumPy, Plotly, Power BI**
- Developed full-stack applications and optimized SQL database performance

PROJECTS

Full-Stack Web App & Data Visualization

- Designed responsive, branded web interfaces with clean UI/UX principles using HTML, CSS, Jinja2, and Flask, including dynamic dashboards and filterable forms
- Developed real-time interactive maps with GeoJSON, featuring multiple base layers, custom marker logic, tooltips, and export functionality for geospatial insights
- Built interactive stacked bar charts with Plotly for comparative consumption/waste analysis, including dynamic color assignment and real-time, session-based filtering
- Automated PowerPoint report generation with python-pptx, embedding charts, metadata, and uploaded images

FastAPI Authentication System

- Developed a secure JWT-based authentication system with a React frontend, handling token storage and client-side access control
- Implemented protected routes with redirection logic and secure API communication between frontend and backend
- Styled a clean, responsive login UI with Tailwind CSS and implemented robust error handling for user feedback

FastAPI CRUD App

- Built a full-stack task manager using FastAPI, SQLAlchemy, and SQLite with complete CRUD functionality
- Designed dynamic Jinja2 templates with responsive HTML/CSS and JavaScript-powered interactivity
- Implemented task completion tracking for improved workflow management

EDUCATION

MNS University of Agriculture Multan

2020 – 2024

BS Computer Science

SKILLS

Backend: Python, FastAPI, Flask, Django, Node.js

Frontend: React, HTML, CSS, JavaScript, Jinja2

Databases: PostgreSQL, MySQL, SQLite

Data/AI: Pandas, NumPy, Plotly, Power BI

Tools: Git, GitHub, Bitbucket, Jira
