

USMAN ALI

SOFTWARE ENGINEER

Lahore, Pakistan · +92 309 8430449 · usmanali07137@gmail.com LinkedIn: <https://www.linkedin.com/in/usman-ali-b0603124a/> · GitHub: <https://github.com/Logic-ui> · Portfolio: <https://usmanaliportfolio12.netlify.app/>

SKILLS

BACKEND | Python • Flask • Fastapi • Django • Php • PostgreSQL • SQLite • NodeJS
Frontend | HTML • CSS • React • JS • Jinja2 • Next JS
DATA ANALYSIS | PowerBI • Python • Numpy • Pndas • Matplotlib • Plotly • Seaborn
DATA Annotators | Image, video, and text annotation with high accuracy
Version control | Git • Bitbucket • GitHub
Project Management Tools | JIRA

WORK EXPERIENCE

LOGICCHASERS Pvt Ltd, Pakistan | software engineer **Aug 2024 - Aug 2025 Islamabad, Pakistan**

- Led backend development using Flask and FastAPI, delivering new features, fixing defects, and implementing API-key and JWT-based authentication.
- Built Power BI dashboards and Python data pipelines using NumPy, Pandas, and Plotly, supporting ML prototyping and data extraction tasks.
- Worked with SQLite and broader SQL databases, and developed full-stack applications using FastAPI, Flask, and Django.

CybeCloud Pvt Ltd, Pakistan | software engineer | remote **May 2025 - Present Islamabad, Pakistan**

- Full-Stack Software Engineer at Cybecloud, developing web applications using Python (Flask, FastAPI, Django) and React.
- Built responsive UIs with HTML, CSS, JavaScript and managed SQL/NoSQL databases for scalable solutions.

Motive | Data Annotator **Nov 2025 - Present Lahore, Pakistan**

- Performed high-quality data labeling for images, text, and videos to support AI/ML model training.
- Ensured accuracy through detailed classification, validation, and quality checks.
- Used annotation tools and followed project guidelines to maintain consistency and meet daily targets.

EDUCATION

MNSUAM, Multan, Pakistan || BSCS **Sep 2020 - Jun 2024**

PROJECTS

Full-Stack Web Application & Data Visualization:

- **Front-End Development:** Designed responsive web interfaces with consistent typography and branding, following clean UI/UX principles and custom fonts. Built dynamic dashboards and filterable forms using HTML, CSS, Jinja2, and Flask templates..
- **Interactive Mapping:** Developed real-time interactive maps with GeoJSON, including multiple base layers, custom marker logic, tooltips, and export functionality to enhance geospatial insights.
- **Data Visualization:** Created intuitive stacked bar charts for comparative analysis of consumption and waste data, with dynamic color assignment, real-time filtering, and session-based updates.
- **PPT Report Automation:** Automated PowerPoint report generation with python-pptx, embedding charts, metadata, and uploaded images.
- **Form & Metadata Management:** Built secure file-upload and asset-management systems with validation, structured storage, and cleanup mechanisms.
- **Data Modeling:** Structured SQLAlchemy models for project metadata and implemented modular color-assignment logic for materials.
- **Data Processing:** Processed and normalized data with Pandas to produce clean, aggregated reports.

FastAPI Authentication & Secure API Development:

- Developed a secure React login form that authenticates users using a FastAPI backend with JWT. Handled token storage, client-side access control, and protected route redirection. Styled clean UI using Tailwind CSS and implemented proper error handling for user feedback.

FastAPI + HTML CRUD Web App:

- Built a full-stack task management app using FastAPI, SQLAlchemy, and SQLite with CRUD functionality, dynamic Jinja2 templates, and responsive HTML/CSS. Implemented task completion tracking and JavaScript-powered interactivity.
